**CMHC Annual Departmental Review Summary (2023)**

At the conclusion of the Spring 2023 semester, the CMHC team met to conduct a formalized annual departmental review. During this meeting, topics discussed included:

- Programmatic assessment procedures and results
- Course progression, offerings, and faculty course assignments
- Multicultural and diversity-related topics related to the student body, faculty and department staff, and course content
- Interdisciplinary projects

The results of this meeting produced the following considerations, changes, and/or modifications to the CMHC program:

1. In response to student feedback, the CMHC program made notable changes to the course progression pertaining to winter class offerings and the practicum/internship offerings. These changes have been implemented over the last academic year and are officially solidified as of the 2023/2024 academic year. All students were made aware of these changes directly, and the latest course progression can be found in the student handbook.
2. In response to a changing and growing department, the CMHC program is examining ways to further foster community and cohesion among the CMHC community.
3. In response to assessment data, the CMHC program will continue to emphasize the role of self-exploration, self-awareness, and self-efficacy within the counseling profession within coursework and supervision.
4. In response to course review data, the CMHC program will continue to enhance its APA style instruction throughout the curriculum.

We welcome your thoughts and feedback related to our ongoing developments. We aim to continually improve this program. We are proud of all of our students and the quality of our program, especially during these difficult times.

-The CMHC Team at Molloy University
