Virtual or in-person visits

Whether you want to meet in-person or virtually, GoHealth Urgent Care has got you covered. With same-day care from your phone or computer, you can get the care you need - when and where you need it.

Enjoy the same high-quality care as you would in person. The provider you meet in a Virtual Visit is of the same standard and training as those you meet in person at one of our centers. In fact, our providers host Virtual Visits right from our centers.

Our services:

+ Allergies
+ Asthma
+ Cold and flu
+ Illness
+ Injury
+ Skin infection & rash
+ Sore throat
+ Sports physicals
+ STD evaluations
+ Urinary tract infections

When should I use Virtual Visits vs. in-person care?

Our virtual providers or teledoctors can evaluate and care for minor illnesses like asthma, respiratory infection, colds, flu, mild fever, headache, nausea, sinus infections, sore throat, and more. They can also care for minor injuries and infections like animal and insect bites, pink eye, poison oak and ivy, rash, sprains & strains, urinary tract infection (UTIs) and more.

Care at your fingertips

Same-day, quality care

Get same-day, quality care via phone, tablet or computer for adults and children 1-year-old and up.

How does it work?

A Virtual Visit allows you to meet with one of our urgent care providers remotely via video when you can't make it to one of our centers.

Available 7-days a week

...including holidays! People don't put their coughs on a calendar, so we don't adhere to one.
